# Camil Gosmanov

Oklahoma City, OK ❖ email@camil.bio

## EDUCATION

**University of Oklahoma College of Medicine** — **2024-2028**
**MD, Medicine**

**University of Oklahoma Honors College** — **2018-2024**
***BS,* Computer Science** — **GPA: 4.0**
***BA,* Economics** — **GPA: 4.0**
***BS,* Chemical Biosciences** — **GPA: 3.9**

- 3.97/4.00 Cumulative GPA; Summa Cum Laude; OU Men's Volleyball Club; Tau Beta Pi
- Studied abroad in 2019 with OU Honors at Brasenose College, University of Oxford

## EXPERIENCE

**Pan Lab at OU** — May 2024 – Present
***Graduate Researcher*** — *Oklahoma City, OK*

- Implemented deep learning methods to discover critical molecular pathways that determine lung cancer outcomes using single cell genomic data.

**Public Health Initiative at OU** — Aug 2019 – May 2023
***President*** — *Norman, OK*

- Led student-focused public health solutions club at the University of Oklahoma to optimize implementation of public health resources through team-based research projects.
- Team projects include: Vaping (2019), Covid-19 (2021), Nutrition (2022), Mental Health (2023).

**McCall Lab at OU** — Jan 2019 – Jan 2022
***Undergraduate Researcher*** — *Stephenson Research and Technology Center*

- Utilized molecular networking data to discover pathogenic mechanisms in tropical parasitic diseases. (*Leishmania* and *Trypanosoma cruzi*)
- Managed parasite maintenance, mass spectrometry sample extraction, and resulting data analysis.

## RESEARCH

**Frontiers in Mass Spectrometry-Based Spatial Metabolomics: Current Applications and Challenges in the Context of Biomedical Research** — **Jun 2024**
*Co-primary author* — *Published in Trends in Analytical Chemistry*

- Investigated implementations of spatial imaging techniques to analyze effects of small molecule metabolites.

**Impact of Visceral Leishmaniasis on Local Organ Metabolism in Hamsters** — **Aug 2022**
*Second author* — *Published in Metabolites*

- Explored pathways of parasite tropism in hamsters by analyzing metabolites using liquid chromatography mass spectrometry.

**Mapping of host-parasite-microbiome interactions reveals metabolic determinants of tropism and tolerance in Chagas disease** — **Jul 2020**
*Co-author* — *Published in Science Advances*

- Studied pathogenic mechanisms of *T. cruzi* through molecular networking and mass spectrometry analysis.
